### Secure & Flexible Space

Anti-vandal units can be used for a variety of applications in almost any location. Offices, canteen & mess facilities, drying rooms or toilet and shower blocks, all finished in durable and high quality materials.

Secure features include an insulated steel door complete with a multi-point locking system and an anti-prise door jamb. The windows all come with hinged steel shutters operated and locked internally. All High level windows are protected with galvanised mesh grilles. The main external structure is fully welded and finished with one coat of primer and a zinc based finish coat.

All units can be stacked up to three high and come with integrated bearing points lifting lugs and fork-pockets. They may also be linked using our Link-System to provide large serviced accommodation blocks.

#### All Anti-Vandal offices include as standard:

- wall and ceiling insulation and lined with vinyl faced plasterboard
- AMF SG windows
- vinyl floor covering throughout
- electric lights and switches
- 13 Amp double power outlets
- 2 Kw heaters on spur outlets
- wired to I.E.E. regulations
